

“
We were not
the best at first

But now, we have become the best Animal medical center in Korea, which shows a new model of animal medical center with systemic treatment, the newest facilities & equipment, and the best staffs.

2009

- Opening Sungshin branch

2012

- First expansion of Sungshin branch

2004

- Opening VIP Anima Hospital at Jangan head center

2010

- First expansion of Jangan branch

2013

- Establishment of VIP Animal Hospital Corporate
- Second expansion of Jangan branch

2017

- Third expansion and remodeling of Jangan branch

2018

- Establishment of VIP Animal Traditional Medicine & Rehabilitation Center
- Selected as MOU Hospital with Konkuk Veterinary Medicine College for 5 consecutive years
- Certified as High tech lab at VIP Animal Medical Center
- The new VIP Heart & Kidney Center (Upcoming)

- Expansion of new professional medical staffs and patient-oriented care system
- MOU with Chungdam Sojoong Dental Clinic
- MOU with Beijing Chongai International Animal Hospital in China (北京 宠爱 国际 动物医院)

2016

- Third expansion & relocation of Sungshin branch
- New title as VIP Animal Medical Center Corporate
- Establishment of VIP Animal Surgical Center
- Opening VIP Animal Medical Center Seochodongjak branch
- First introduction of CRRT at VIP Animal Medical Center in Korea
- MOU with Life Science Institute of Konkuk University

2014

- Second expansion of Sungshin Women's University branch

Mission

World Class VIP Animal Medical Center that contributes to the development of veterinary clinical medicine and the healthy life of companion animals through the high class of practice, education and research

Vision

Core Value

Communication and cooperation

Harmonized hospital with communication, cooperation, and positive mind

Professional mind

Hospital with professional mind, Passion and expertise

Pursuit of happiness

Hospital where Patients, Clients and staff are happy with pursuit of happiness

Referral request guide

Appointment and Reception of Secondary Care at the Hospital

- You can make a reservation for the request of medical examination, previous test results, and records of prescribed medicines in the following ways.

✉ | Receiving E-mail | vip2@vipah.co.kr

🗨️ | Receiving KakaoTalk | ID : vipah3

Requests for medical treatment and brief medical records are available by KakaoTalk Image.

- For smooth medical examination, please be aware of the fasting information before inspection.

- Blood test and abdominal ultrasound examination require 10 hours fasting

VIP

Animal Medical Center

Radiology / general surgery academic support information for cooperative hospitals.

- For cooperative hospitals, you can use the Academic Support Corner in the Department of Radiology and Surgery Center operated by the hospital.

• Academic support information

- In the surgical department, general surgical consultation such as surgery, prognosis, surgical method, and post-operative management is available.

- In the radiology department, we will help you to read and differentiate images such as X-ray, sono, CT, and MRI.

• Direct academic support phone number

☎️ | Direct contact | 010-2618-0075

🗨️ | Consulting KakaoTalk | ID : vipstudy

You can use KakaoTalk to ask for medical photos.

(However, please send us good quality video through PC KakaoTalk, and please inform us about patient information and clinical symptoms before the inquiry.)

“ Organized & Collaborative medical care system

There is a difference in the ability of referral animal medical center which comes from the Organized & Collaborative medical care system. The 'Organized & Cooperative medical care system' can make the hospital way more than we think.

01 Pride of VIP

Collaborative Medical care system of VIP Animal Medical Center is a pride that's differentiated from any other hospitals.

We can provide the best medical care through the collaboration of professional medical staffs, safe and perfect surgery which takes into consideration the condition of the patient's disease comprehensively, and systematic postoperative management.

02 Certified treatment system

We are pride of VIP Animal Medical Center's proven cooperative medical care system, which is not focused on a particular clinic or staff.

Our system is the best in the "correct diagnosis and treatment" of heart, kidney, and hormonal diseases, especially those with "intractable multiple diseases patients".

03 Collaboration of professional medical staffs

VIP Animal Medical Center has established cooperation system between specialists in Heart & Kidney centers.

We can provide safe anesthesia and thorough post-operative management, especially for patients with age / severe illness.

04 Systematic collaborative medical care

Collaborative medical care gets crucial in the intensive treatment of critical patients.

A systematic collaborative treatment system by a dedicated specialist team can improve the survival rate of severe / multiple diseases patients and dramatically reduce the average length of hospital stay.

Introduction of specialized medical care

Internal medicine specialized clinic

- | | |
|--|---|
| Cancer Clinic
- Chemotherapy / Target chemotherapy
- Metronomic chemotherapy | PRP regenerative treatment
- Endoscopic ballon dilatation for esophageal stricture
- Endoscopic biopsy, diagnosis of Helicobacter
- Stomach, small intestine, colon diagnostic endoscopy / Foreign body removal |
| Regenerative medicine Clinic (intractable disease)
- Stem cell treatment
- PRP regenerative treatment | |

Specialization in radiology

- | | |
|--|--|
| Computed tomography GE 16ch CT
- CT angiography / lymphangiography | Detailed sonography TOSHIBA
- Musculoskeletal and joint sonography
- Eye / neck / ventricular sonography
- Contrast-enhanced sonography / elastic sonography |
| Detailed echocardiography GE E9
- Sector Probe for small animals
- Sector Probe for medium / large animals
- Trans-Esophageal Echocardiography (TEE) | Fluoroscopic examination
- Tracheal / bronchial fluoroscopy
- Image-based intervention |

Specialized Facilities for intensive care

- Separated ICU
- Emergency room
- Isolation treatment room

Specialized clinic for cat

Certified "Cat-Friendly Hospital Gold Level"

Specialized surgery

- | | |
|---|--|
| Nervous System Specialized Surgery
- Disc surgery (cervical, thoracic, lumbar)
- Brain surgery: ventriculoperitoneal shunt
- Skull surgery: decompression for COMS patients | Laser specialized surgery
- CO2 laser / Diode laser surgery |
| Joint specialized surgery
- Stifle joint: TPLO surgery
- Minimum invasive surgery for sacroiliac luxation | Open thoracic / laparoscopic surgery
- Thoracic duct ligation surgery
- Lobectomy / Hepatic lobectomy / Cholecystectomy
- Surgery for Portosystemic shunt
- Adrenalectomy
- Surgery for Patent ductus arteriosus |
| Urology specialized surgery
- Subcutaneous Ureteral Bypass (SUB)
- Subcutaneous Ureteral Bypass | |

Ophthalmology specialized treatment

- | | |
|--|---|
| Glaucoma surgery
- Diode laser glaucoma surgery
- Cryosurgery for glaucoma
- Valve implantation for glaucoma
- Artificial eye insertion | Corneal / Cataract Treatment
- Corneal lens insertion treatment
- PRP corneal regeneration therapy
- PRP corneal regeneration therapy |
|--|---|

Anesthesiology / Pain management

- Heart disease-specific anesthesia program
- Older animal specialized anesthesia program
- Patient-specific pain management program
- 30,000 cases of anesthetic know-how

Dental specialized treatment

- Oral and maxillofacial surgery
 - Oral and maxillofacial surgery
- Endodontic therapy
 - Endodontic therapy, resin therapy, crown therapy

Oriental medicine specialized treatment

- Oriental medicine / moxibustion treatment
- Oriental medicine / moxibustion treatment
- Herbal food treatment

Rehabilitation specialized treatment

- Water treadmill therapy
- Hyperbaric oxygen therapy
- Laser / Ultrasound / Tense therapy
- Exercise therapy / Dog PT treatment
- Aromatherapy / Massage therapy

VIP Heart & Kidney Center Specialized Clinic

- | | |
|---|--|
| CRRT Clinic
Peritoneal dialysis Clinic
Cardio-renal syndrome Clinic
Vascular Intervention
- Percutaneous heartworm removal
- PDA intervention surgery
- Tracheal stent implantation | Older Animal Multiple Diseases Clinic
- Cushing / diabetic complications / complex hormone disorder
- Liver, biliary, digestive multiple diseases control
- Heart / kidney / pancreatic multiple failure control |
|---|--|

01

Hemodialysis clinic

We have various treatment cases as "CRRT applied pioneer hospital" which widely is known as "Hemodialysis treatment using CRRT" to many animal hospitals in Korea.

- 2016 Dialysis for CRRT seminar with Taiwan medical team lecture
 - 2016 Hemodialysis Clinical live seminar - lecture tour in 8 areas including Ulsan, Busan, Gwangju, and Cheongju
 - 2017 KAHA Conference - 'Hemodialysis using CRRT' lecture
 - 2017 Seoul Veterinary Conference - 'Effectiveness of Hemodialysis through CRRT' lecture
- Through the following and other various presentations and lectures on hemodialysis, we are contributing greatly to the development of veterinary medicine.

02

Heart disease specialized clinic

The VIP Heart & Kidney Center is leading the development of cardiology in Korea through technical advisory from the Cardiology professors at Urban University in the United States.

The VIP Heart & Kidney Center, in cooperation with the medical staff and the department of radiology, is establishing accurate diagnosis and treatment plan and presenting effective treatment directions according to the patient's situation.

In particular, the VIP Heart & Kidney Center staffs are confident that they have the best skills in heart and kidney diseases, including 'control of patients with severe heart failure', 'control of multiple diseases of old aged animals', 'control of heart failure', and 'interventional procedures'

03

Specialized clinic for cat

VIP Animal Medical Center Cat Clinic is ISFM (International Cat Care) "Cat-Friendly Hospital's highest grade (Gold Level)" certified hospital.

In addition to facilities, we have experienced countless case of cat patients, with as much as 35% of total cases.

Veterinarians who are experienced in 'treating cats with serious multiple diseases' rather than simply saying that we treated 'a lot of cats' promise the best treatment in a 'cat-friendly space'.

04

Oriental Rehabilitation Specialized Clinic

The VIP Traditional Medicine & Rehabilitation Center is the first hospital in Asia to be certified as an internship certification institution of the Canine Rehabilitation Institute in USA. (CRI).

The VIP Traditional Medicine & Rehabilitation Center has a medical staff who acquired the qualifications of "Animal Rehabilitation Therapist", "Veterinary Oriental Acupuncturist", "Veterinary Oriental Medicine Food Treatment Specialist", and "Veterinary Oriental Medicine Specialist", who will contribute to improve the quality of life of companion animals by providing a variety of herbal and rehabilitative medical treatments such as acupuncture therapy, tense therapy, ultrasound, laser, exercise treatment, underwater treadmill, and etc.

Center

Welcome to
VIP Animal Medical Center

The VIP Animal Medical Center has been growing and becoming as one of the best animal hospitals in Korea since 2004.

We keep trying the best to provide the cutting edge treatment by following our patient-oriented principles. And we will become the animal medical center that contributes to the development of the whole veterinary clinical medicine and healthy life of companion animals through studying and researching without pause.

“Best practice for our patients”

“Best satisfaction to our customers”

“Best pleasure for our staffs”

There is always full of happiness and smile within VIP Animal Medical Center.
Thanks.

김영준 박영희 신영희
A.재민 이승현 최이훈

“VIP is special.”

VIP Animal Medical Center is a total animal medical center with the highest level of medical facilities and cutting edge equipment in Korea. We provide professional services through each department. We commit ourselves to treatment by an Surgical Center / Traditional Medicine & Rehabilitation Center / Heart & Kidney Center with special expertise and intensified medical care

The best Facility

The best medical system / cutting edge equipment in Korea

Credible skills

More than 10 professional staffs with the best expertise

Rich experience

30,000 cases of anesthesia (6,000 diagnoses from heart disease)

Cooperation with college

Cooperation with animal hospitals in the major Veterinary colleges such as Konkuk University

College consignment educational institution

Major veterinary college consigned educational institution such as Konkuk University

First,

VIP Animal Medical Center pursues **‘professionalism’**. Veterinary medicine is not **‘experience’** but **‘science’**.

Now, it is very crucial to diagnose correctly with systemic treatment. One vet cannot be an expert in all fields that’s why special care from different departments is necessary.

VIP Animal Medical Center consists of Master/Doctorate veterinarians who can provide special care with expertise in each department, such as General internal medicine, Oncologic medicine, Cardiovascular medicine, Kidney internal medicine, Orthopedic medicine, Neurosurgery, General surgery, Ophthalmology, Dentistry, and Rehabilitation medicine.

Second,

We operate our hospital with **‘patient-oriented’** under the motto **‘Always do properly with pride and warm heart’**.

“Patient-oriented” principle of VIP Animal Medical center is from the respect for animal life. All staffs at the VIP Animal Medical Center have sincere mind for animals and love animals with their own profession.

The ‘patient-oriented’ principle is more essential when intensified-critical care or emergent care is needed. All staffs have the mind in their heart no to make medical accidents’.

Third,

VIP is always ahead of others. We make an effort more than others do and do our best for **the development of the veterinary medicine.**

VIP Animal Medical Center has been designated as a consignment educational institution from Konkuk Veterinary College since 2012. The clinical training rotation of Konkuk Veterinary College’s senior students is directly managed directly by our hospital and we also take part in the clinical educational institution for the other veterinary college students in Korea.

Preliminary veterinarians can experience the high level of medical care and customer service at the VIP Animal Medical Center by themselves. We also hire competent veterinarians each year as educational institution besides animal medical care.
